IDENTIFIERS Pensacola Junior College FL

ABSTRACT

At the close of the spring 1997 term, Florida's Pensacola Junior College (PJC) undertook an analysis of enrollment to determine trends from the previous spring term. Results of the analysis included the following: (1) PJC ended spring 1997 with 2,648 unadjusted fundable full-time equivalent (FFTE) students, a drop of 8%, or 231 FFTE, from spring 1996; (2) unduplicated fundable headcount enrollment at the end of spring 1997 was 13,357, representing a 6.9% decrease from the previous spring term but indicating a slight increase in the number of credits taken per student; (3) much of the enrollment loss was accounted for in the college credit area of advanced and professional education and postsecondary vocational education, with the two areas showing 160 total fewer FFTE and 83 fewer paying students between 1996 and 1997; (4) adult basic education and general education development (GED) prep represented another area of substantial loss, accounting for 70 fewer FFTE, or 30.3% of the unadjusted FFTE loss; and (5) although the 8% decline in FFTE was substantial, there was a decrease of only 4.5% in fee paying college credit FFTE. Six data tables are appended. (HAA)

MM 5/2/97

Findings: For Spring Term 1997, Pensacola Junior College ended the term with 2,648 unadjusted fundable FTE (FFTE). This was a drop from the Spring 1996 FTE of -231 or -8.0%.

	<u>Spring</u> <u>Term 1996</u>	<u>Spring</u> <u>Term 1997</u>	<u>Net</u> <u>Change</u>	<u>%</u> <u>Change</u>
Fundable FTE (unadjusted)	2,879	2,648	-231	-8.0%

District Spring 1997 unduplicated fundable headcount was 13,357 (minus -988 or -6.9% from the same term last year). Fall 1996 unadjusted fundable FFTE was 2,822; down -181 or -6.0%; and fall 1996 unduplicated fundable headcount was 13,781; down -646 or -4.5%.

ANALYSIS

District FFTE:

1. The overall FFTE rate of loss from last spring of -231 FFTE or -8.0%, represented a substantially negative change compared to the spring of 1996 (-117, -3.9%). Term headcount fundable unduplicated enrollments are down -6.9%, which indicate a slight positive change in the number of credits taken per student, though 1,799 fewer total students matriculated this term than last spring.
2. Much of the negative spring FFTE trend is largely accounted for in the college credit area of: Advanced & Professional (A&P) and in Postsecondary Vocational (PSV).

	<u>Last Year</u>	<u>This Year</u>	<u>Change</u>	<u>% Change</u>
A&P	1,456	1,325	-131	-9.0%
and				
PSV	605	576	-29	-4.8%
	—	—	—	—
Total (A&P + PSV) College Credit	2,061	1,901	-160	-7.8%
Minus Dual Enrollment	207	130	-77	-37.2%
Paying Students	1,854	1,771	-83	-4.5%

This is a loss of -83 (or -4.5%) in fee paying FFTE in this area. The sites of college credit FFTE changes for the 1997 Spring term were:

Pensacola:	A&P	1,093	991	-102	-9.3%
	PSV	352	360	+8	+2.3%
Warrington:	A&P	162	172	+10	+6.2%
	PSV	218	188	-30	-13.8%
Milton:	A&P	200	162	-38	-19.0%
	PSV	34	29	-5	-14.7%

3. The college credit loss (A&P + PSV) of -160 FFTE equalled 69.3% of all FFTE loss in 96972. However, the unadjusted dual enrollment loss (in A&P + PSV) of -77 FFTE represented 33.3% of all FFTE loss in 96972. (Thus dual enrollment FFTE loss was 48.1% of the total loss in college credit FFTE that term.)
4. Another substantial loss in FFTE was in the area of Adult Basic Education (ABE) and in General Education Development Prep (GED).

	<u>Last Year</u>	<u>This Year</u>	<u>Change</u>	<u>% Change</u>
ABE	230	170	-60	-26.1%
GED	55	45	-10	-18.2%
	—	—	—	—
Adult Education	285	215	-70	-24.6%

5. Adult education (ABE + GED) represented 30.3% of the unadjusted FFTE loss in 96972.
6. The rate of decrease of -8.0% FFTE 96972 v. 95962 is over twice the rate of -3.9% FFTE for 95962 v. 94952; a trend of some concern (Table VI).
7. It must be observed that although the overall rate of -8% for all FFTE was substantial, there was only a decrease of -4.5% in *fee paying* college credit (A&P + PSV) FFTE.
8. A general discussion of cause and effect concerning these trends will be discussed in detail in the 1996-1997 end of year enrollment report.

Conclusions: Spring term 1997 compared to spring term 1996 records a decline in enrollments in terms of both FFTE and HC. Marked decreases are present in the tuition and fee payers in the college credit categories of A&P and PSV.

Exceptions: Variations by district and by campus in the proportion of plus or minus $\pm 10\%$, or more are boxed in the following tables. Exceptions in excess of $\pm 20\%$ are
boxed and highlighted

Recommendation: All efforts to recruit and retain students should be continued and increased.
